

TS Dennis Construction, Inc. - Jacksonville home builder

Description:

TS Dennis Construction, Inc. is a Jacksonville home builder and roofing contractor that conceives and builds affordable custom homes for today's homeowner. Our professional Jacksonville home builders strives to keep home prices down and quality up. As we all know, in the real world this is often hard to do, more with less we always hear.

At TS Dennis Construction, Inc., we have found if we keep our employees and sub contractors filled with steady jobs, this problem handles it self. Along with our homes we build to sell, we enjoy building for investors that may have spare lots. We have found there are many investors that have bought a house for rental purposes, and it has a lot that came with it. We can build a quality home on that lot for rental or resale.
